

BLINKIT OUTLET PERFORMANCE DASHBOARD

Power BI Business Intelligence Project

OBJECTIVE

- Analyze Blinkit's overall sales and outlet performance.
- Identify top-performing products and outlet types.
- Understand customer preferences and purchasing patterns.
- Provide interactive insights to support better business decisions.
- Develop an interactive Power BI dashboard to track key KPIs, understand customer preferences, and support data-driven business decisions.

METHODOLOGY

Data Collection

- Imported Blinkit retail dataset into Power BI.

Data Preparation

- Cleaned and transformed data using Power Query.
- Standardized categorical values.
- Verified data quality and consistency.

Data Modeling

- Created measures and calculations using DAX.
- Established relationships between data fields.

Dashboard Development

- Designed interactive visualizations.
- Implemented slicers and filters for user interaction.
- Developed multi-page dashboard for overview and detailed analysis.

IMPLEMENTATION

Dashboard Overview Page

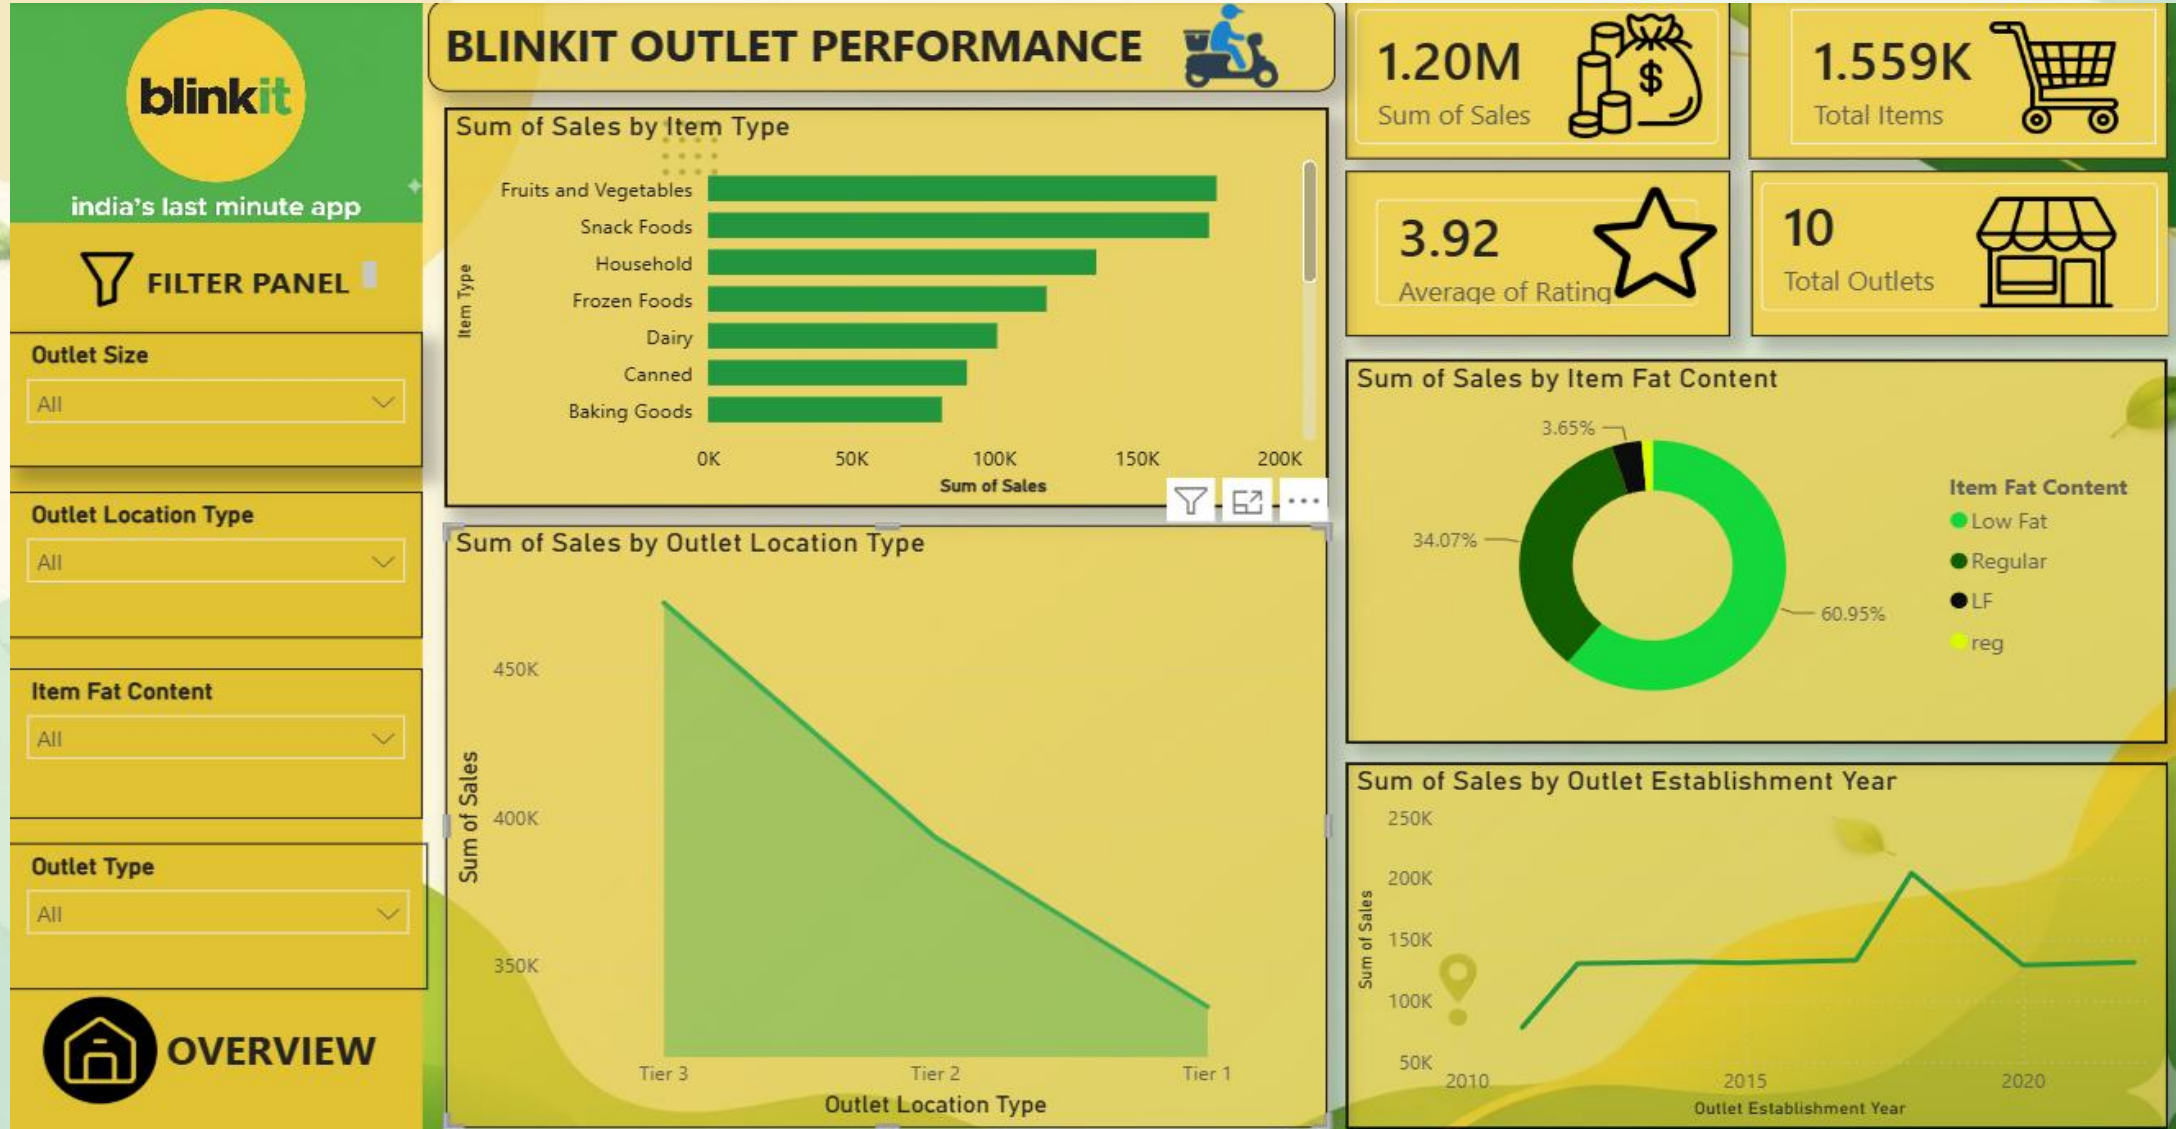

▪KPI Cards

- Total Sales
- Total Items
- Average Rating
- Total Outlets
- Sales by Item Type (Bar Chart)
- Sales by Outlet Location Type (Area Chart)
- Sales by Outlet Establishment Year (Line/Area Chart)
- Sales by Item Fat Content (Donut Chart)

▪Interactive Filters

- Outlet Size
- Outlet Location Type
- Item Fat Content
- Outlet Type

DEMONSTRATION

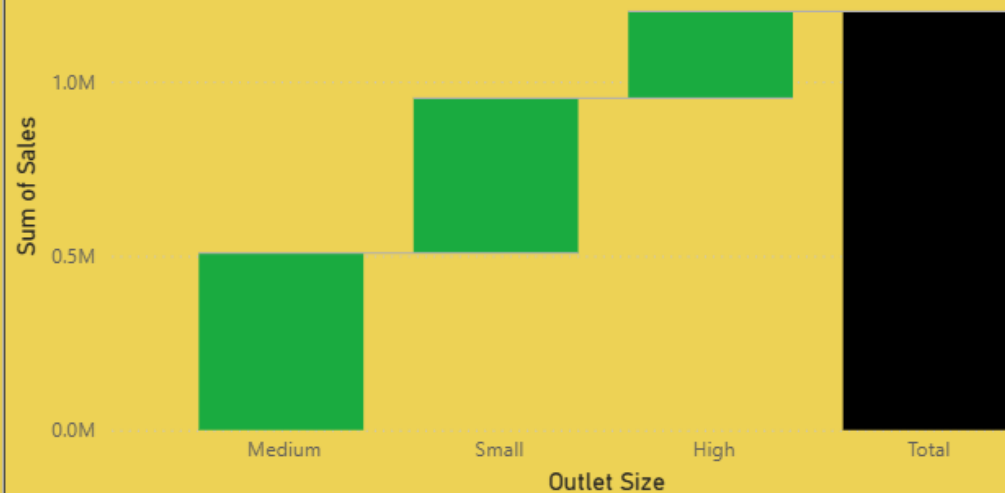

SALES DRIVER ANALYSIS

Item Type	Grocery Store	Supermarket Type1	Supermarket Type2	Supermarket Type3
Starchy Foods	1,926.00	15,370.55	2,580.38	2,003.10
Soft Drinks	7,673.37	39,002.05	6,289.63	5,549.11
Snack Foods	21,327.84	1,14,296.13	20,003.24	19,806.71
Seafood	1,438.16	5,681.52	1,089.99	868.20
Others	3,467.27	14,826.67	2,556.27	1,601.69
Meat	9,081.05	36,169.76	6,365.94	7,833.12
Household	18,983.44	89,443.44	14,344.55	14,596.36
Total	1,51,939.15	7,87,549.89	1,31,477.78	1,30,714.67

Sum of Sales by Outlet Size

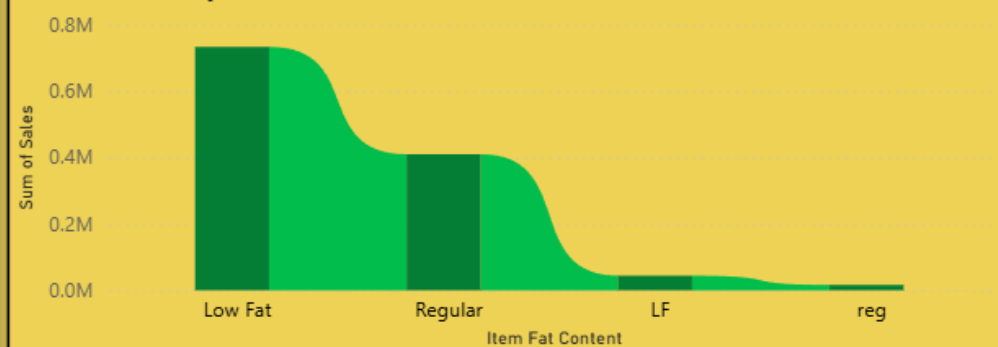

● Increase ● Decrease ● Total

Sum of Sales by Item Type

Sum of Sales by Item Fat Content

OUTCOME

Product Performance

- Fruits & Vegetables emerged as the highest-selling category.
- Snack Foods and Household products contribute significantly to revenue.

Outlet Performance

- Supermarket Type1 contributes the highest sales.
- Medium and Small outlets generate major revenue contributions.

Customer Preferences

- Low Fat and Regular products account for the majority of sales.

Business Benefits

- Improved visibility into sales performance.
- Faster decision-making through interactive reporting.
- Easy identification of top-performing products and outlets.

CONCLUSION

- Successfully developed an interactive Power BI dashboard for Blinkit sales analysis.
- Identified top-performing products, outlet types, and customer preferences.
- Supported data-driven decision-making with actionable business insights.
- The dashboard transforms raw retail data into meaningful insights, helping improve business performance and strategic planning.
